Metodické pokyny

- 1) Žáci vypočítají příklad a podle výsledku vybarví příslušné políčko.
- 2) Pokud vše správně vypočítají a vybarví, měl by jim vzniknout obrázek šneka.
- 3) Žáci mohou volit různé strategie. Někdo nejprve vše spočítá, a pak vybarvuje obrázek. Jiní zase po každém výpočtu hned vybarvují.
- 4) Většinou tisknu dvě zadání vedle sebe, takže každý žák dostane zadání ve formátu A5.
- 5) Žáci pracují samostatně a chodí si kontrolovat.
- 6) Materiál je vhodný třeba i do suplovaných hodin.
